PROJECTS

Real Estate website. This project was made to list properties for sale rent by users. With a very handy UI it makes it easier for everyone's use. The tech stack used in it is MongoDB for database, ReactJS as a framework, ExpressJS and NodeJS as backend . And Tailwind css for styling. (Try it here)

Portfolio. This was built as my portfolio consisting of everything about me ranging from my projets to my experience to my skills. Simple web stack was used to build this html, css, and javascript. (Try it here)

file manager using java Built a project that works like any pre installed file manager. But with a simpler user interface. Java core and Java swing and AWT were used to make this.
